Career history

Software Developer at Andersen Lab

Aug 2020 - Present (1 year 7 months)

As long as it is an outsource company, I have multiple experience:

VitaStudents

10/2021 — Present

VitaStudent allow people around the world to find accommodation for their study in UK/ES. I am responsible for deconstructing monolith system and use DDD to build multiple apps with the ability for users to check their booking, see accommodation updates, receive required services. Setting up AWS Fargate, writing required Lambda functions, syncing scripts. Mostly using NodeJs, Typescript and React here.

MeTime SAAS

05/2021 — 10/2021

MeTime provides a simple way to connect medical professionals and people looking for cosmetic procedures. My main goal on this project was to implement VueJs frontend with a newly created design.

Energetic Hub Telephony SAAS

02/2021 — 05/2021

Application that allowed contact centers to collect calls analytics. Was in charge of building Laravel backend and complex database queries to structure asterisk data in a user friendly way.

Insly Broker SAAS

08/2020 — 02/2021

Was responsible for PHP/Symfony based backend, that allowed insurance brokers to interact with customers and collect installments for insurance. Integrated new features, calculation logics, user dashboard.

Full Stack Web Developer at Uralenergotel

Jan 2018 - Aug 2020 (2 years 7 months)

Uralenergotel CRM

08/2018 — 08/2020

Designed and developed a CRM application for specific company needs using Laravel, Postgres, Nuxt and Redis. It allows to sync products from suppliers to e-shop, make and schedule calls (using Asterisk), create/sign invoices and send it to customers with a few clicks and way way more. It resulted in productivity growth and sales increase for more than 80%!

Uralenergotel e-Shop

01/2018 — 06/2018

Built SEO ready e-shop that allowed company to attract more customers. Application is as pure Laravel 5 monolith with MySQL and jQuery.

Specialist at Commercial Bank of Support to Commerce and Business

Aug 2014 - Aug 2016 (2 years)

My main responsibility was to provide analytics. Here I first met with SQL query language. Learned how to use complicated queries to receive specific data.
